Comments: The UAA was conducted in July, 2005, and no WBCR was observed at the six sites evaluated. The stream met both the maximum and average depth criteria in 4 sites and the average depth criterion at two sites. Tetra Tech revisited 4 sites on July 10. The stream met both depth criteria at 1 of 4 sites and the average depth criterion at 2 sites. Because of the overall depth of the stream, the committee recommends retaining the WBCR designation.

Committee Recommendation: ☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive
